MEMORANDUM ORDER

No. 01
Series 2010

SUBJECT: TEMPORARY BAN ON THE IMPORTATION OF FMD-SUSCEPTIBLE ANIMALS, THEIR PRODUCTS AND BY-PRODUCTS ORIGINATING FROM THE REPUBLIC OF KOREA

WHEREAS, based on the official report submitted by Dr. Kiyoon Chang, Chief Veterinary Officer, to the Office International des Epizooties last 07 January 2010, there was an outbreak of Foot and Mouth Disease (FMD) in Korea;

WHEREAS, the FMD outbreak was reported in a dairy cattle farm in Kyonggi-do Province;

WHEREAS, there is a need to prevent the entry of FMD-susceptible animals, their products and by-products originating from the Republic of Korea to protect the health of the local livestock population;

NOW, THEREFORE, I, ATTY. ARTHUR C. YAP, Secretary of Agriculture, by the powers vested in me by law, do hereby institute the following emergency measures:

1. Banning the importation of FMD-susceptible animals, their products and by-products originating from the Republic of Korea;
2. Immediate suspension of the processing, evaluation of the application and issuance of Veterinary Quarantine Clearance (VQC) to Import of the above-stated commodities from the Republic of Korea by the Bureau of Animal Industry (BAI);
3. Stoppage and confiscation of all shipments of FMD-susceptible animals, their products and by-products into the country originating from the Republic of Korea by all DA Veterinary Quarantine Officers/Inspectors at all major ports;

This Order shall take effect immediately.

ATTY. ARTHUR C. YAP
Secretary

Epidemiology

epidemiological comments

Private veterinarian first found suspicious cases in the affected farm and reported them to the local government and to the Kyonggi-do Veterinary Services on 2 January 2010. It was negative by penside test kit on 3 January 2010. On 5 January, the local government veterinarian visited the farm again and tested the cattle which showed suspicious clinical signs and found some positive results. The National Veterinary Research and Quarantine Service (NVRS) finally confirmed positive on 7 January. Various animal health measures have been implemented on that farm including movement restriction, disinfection and stamping-out and an epidemiological investigation was started.

Location of the outbreak(s) or origin of infection
 - Unknown or inconclusive

Control Measures

| | | | | |
|---|---|--|-------------------------------|--|
| <ul style="list-style-type: none"> - Stamping out - Movement control inside the country - Zoning - Disinfection of infected premises/establishments | To be applied Vaccination Prohibited | | - No Planned Control Measures | |
| | Yes | | Yes | |
| Animals treated | No | | | |

Entry / Zone

Entry or zone: a zone or compartment

Diagnostic test results

| Laboratory Type | Name of Laboratory | Species | Test Type | Date Results Provided | Result |
|---------------------|---|---------|---------------|-----------------------|----------|
| National laboratory | National Veterinary Research and Quarantine Service (NVRQS) | Cattle | real-time PCR | 07/01/2010 | Positive |

Weekly Reporting

Further reports will be submitted in relation to this event?
 are outbreaks that are still recorded as unresolved. It is not possible to declare this event resolved until these individual outbreaks are resolved.
 Event is continuing. Weekly follow-up reports will be submitted.
